## **Description:**

Create a React application for a to-dos list where the user can add new tasks, delete them and mark each task done or undone.

## **Key Features:**

- 1. Display the list of to-dos.
- 2. New tasks can be added to the list.
- 3. An empty task cannot be added. (validation necessary)
- 4. Each task can be deleted.
- 5. A modal is displayed before the user confirms to delete a selected task
- . 6. Each new task in undone by default and can be changed to done.
- 7. A dropdown is also available in the page which separates done and undone tasks.

## **Optional Enhancements:**

- 1. Add Edit a task feature.
- 2. Add proper toasts after each action
- 3. Read/Add data to localStorage.
